

Sahana Balaji Portfolio

Your go-to portfolio for coding creativity, project insights, and a peek into my world of ideas.

Step into the digital portfolio of a Computer Science junior with a passion for combining technical expertise and creative problem-solving. Through this site, you'll explore my journey—from professional experiences like building efficient systems and tackling challenging projects to personal endeavors that showcase my curiosity and unique perspective. Each section of my portfolio has been carefully crafted to reflect my technical skills, attention to detail, and love for innovation.

Whether you're a recruiter, a peer, or simply curious about my work, you'll find engaging projects, detailed case studies, and interactive elements that offer insights into my approach to coding and design. Beyond technical expertise, this portfolio offers a glimpse into my creative side, showcasing my interests in movies, space exploration, and culinary adventures. With a clean, responsive design and a focus on usability, my portfolio is designed to be as user-friendly as the projects I create.

Personas:

Technical Recruiters-Looking for a candidate who demonstrates both technical expertise and creativity.

Peers and Mentors-Gaining insights into collaborative projects and personal growth.

General Audience- Curious individuals exploring an engaging portfolio.

Comparables:

Alex Portfolio: Clean and minimalistic design

Jane Developer: Focus on coding projects

Design Layout Features:

Header: Sticky navigation with links to About Me, Technical Experience, and My Interests.

Main Sections:

Introduction: Warm, engaging welcome with your tagline.

Work Experience: Professional milestones with clean layouts and short descriptions.

Projects: Interactive showcase of coding accomplishments with live links.

Personal Interests: A visual collage that tells your unique story.

Footer: Clean copyright.

Short flow:

User flow:

The entry point - homepage (About Me)

↓
it introduces user to me
(my image, little description)
├──> also can view my resume by clicking on
 resume button and downloading it.
└──> next can navigate to different sections like
 technical experience or my interests.

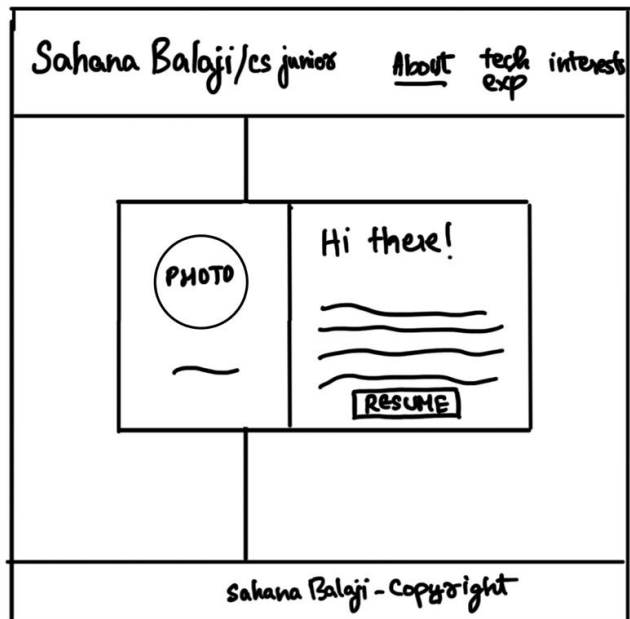

Clicking on technical experience page
├──> user sees description of my
 work experience with company
 details, roles and achievements
├──> images are also viewed
└──> user also views my project work
 descriptions

Clicking on my interests page → user lands on a visually engaging
page highlighting my hobbies
and passions as it is a
reflection of my personal and
fun side

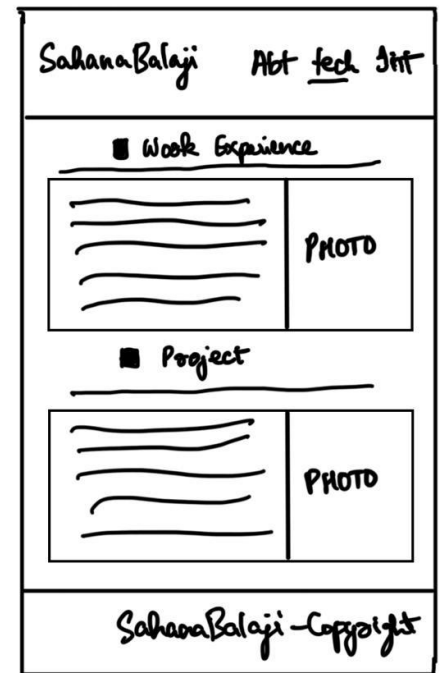

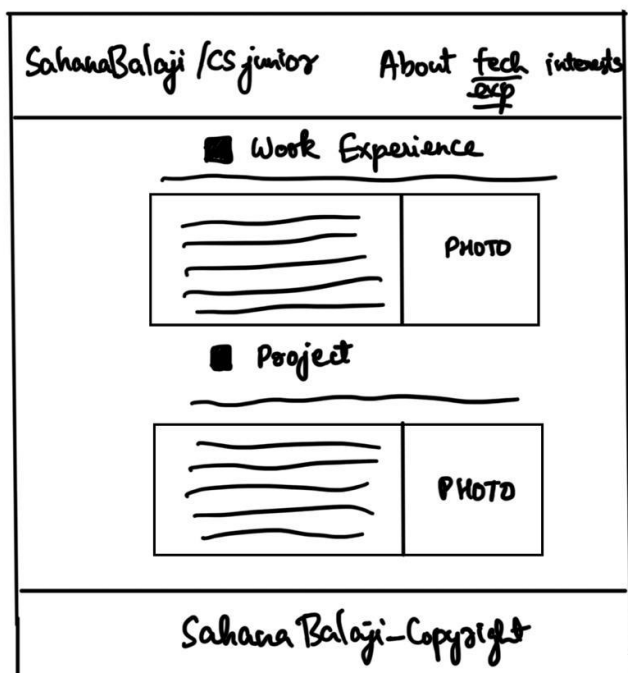

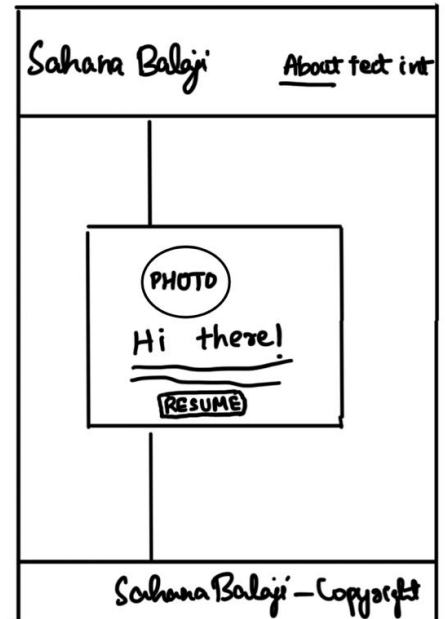

Exit point → user can again return to navigation to either
explore other sections or exit by closing
the site
